Academlo

Web developer   Graduated December 2022
Web Application Development with React

Desarrollo Fron-End con React
certificate

Web Development Fundamentals

certificate

Fundamentos en HTML, CSS y Javascript

AVERAGE 10/10

Colombian Polytechnic   Spring 2022- Fall 2023
Computer Technology

MAIN PROJECTS

E-Commerce   February 2023 – February 2023

An application where users make product purchases

- Design and development adjusted to mobile devices. data and managing libraries like Axios and React-Redux;
- The products are consumed from a postman APIS to make purchases you must register, I used validations.
- The app was tested by During the development of the assigned app I used React js, Redux, Boostrap-React, ReactRoute, Axios and CSS3.
- Support colleagues regarding the project. In the creation of the project I lasted 2 weeks.

January – February 2023

Pokemon

A user simulation to display the data of each Pokémon.

- The details of each Pokémon are shown, they are also filtered by their types.
- React js, Redux, React-Route, Axios, UseForm, UseNavigate and CSS3 were used.
- During the development I fulfilled the assigned task, in addition to that I fulfilled the optional challenges.
- In the creation of the project only last 1 week.

CRUD

Application of a TO-DO to create, edit and delete a specific task.

- APIS were consumed from an HTTP server to fetch and manipulate interface data
- Application created with React js and Axios.
- During the development of the application I lasted 1 week to finish it

Rick y morty

User simulation app with Rick and Morty characters.

- I have used an APIS from a website to bring the data of each character.
- Specific data for each character is displayed and characters are filtered.
- I used React and Axios for web development.
- During the development I lasted 1 week to finish it.

weather app

A weather app to know the temperature and weather of your location

- During the development an APIS was consumed to bring accurate data and use it in favor of the APP.
- In the web application it shows the current, maximum and minimum temperature.
- We can change from Fahrenheit Degrees to Centigrade, the conversion was made to look with more precision.
- Change the background of the image according to the weather.
- Axios was used, states and props were handled.
- During the development I lasted 1 week to finish it

Random phrases

Application that gives a random phrase in English.

- A JSON was saved with the phrases, more than 100 phrases.
- Application created with React js using the props and states.
- During the development of the application I lasted 2 days to finish it.

E-Commerce

Application created in order to simulate a virtual store

- An application created with HTML, CSS and Vanilla(Javascript).
- It is an application to make purchases, it simulates a virtual store
- During development I lasted 1/2 week to finish it.

To-Do

Application created in order to create tasks.

- This app creates a task list with the functionality to delete and cross off the task to know that it is done.
- An application created with HTML, CSS and Vanilla(Javascript) worked with local storage.
- During the development I lasted 2 weeks to finish it.

WORK EXPERIENCE

Company   Ciudad, Estado, País
Independent   Agosto 2015 - Presente
- ▪ Work and management of digital media; Social networks, digital advertising, Podcast / management of Illustrator and adobe premiere
- ▪ I used a lot of npm's JavaScript module and learned about a lot of good web development practices;
- ▪ React is a Library to optimize the workflow of an application development based on React.js + Redux.

Bootcamp   Ciudad, estado, país
Academlo   Verano de 2014
   Developed real-time weather API with React-JSX. Creation of Ecommerce
SKILLS

PROGRAMMING LANGUAGES
1 years: Java, JavaScript
1 years: React / Hooks Frontend
6 months: Python, PHP, Matlab/Octave, VBA

TECHNOLOGIES
HTML, CSS, node.js, JavaScript, React-Redux, Liberty-React- DOM, Programmation logic

AWARDS

ONLINE COURSES

Third place in my club's tennis tournament (2022)

Algorithms: Design and Analysis Part 1 (Platzi, 2022), Mobile Applications for Android (Platzi, 2021) and Programming in Python (Platzi, 2021)
